

Soutenances de Projets Scientifiques 2018 – M2 Eau et Agriculture

Salle Ferguson, Bât 21, Montpellier SupAgro

30 janvier 2018

14h00-14h30

Campan P., Ramananjatovo T. and Roman S.

"Decomposition of flood hydrographs at the outlet of a Mediterranean watershed using water electrical conductivity"

14h30-15h00

Bontoux C., Gendron T. and Pobaldor N.

«Sensitivity estimation of Aquacrop to soil parameters under climate change : application to rainfed vegetable gardening in the Hérault area, France»

15h00-15h30

Caravaca A., Delaunay F.

« Definition of a drought indicator based on Optirrig crop simulation under 4 pedo-climatic contexts »

15h30-16h00

Bertot T. Hussain O. and Petit J.

« Scaling the Impact of hydrological connectivity uncertainty on runoff modelling »

16h00-16h30

Dhouib M. and Raherizatovo T.

« Technical innovation for a better water management in surface irrigation »

16h30-17h00

Bonraisin G., Barreix, M. and Pailhoux L.

"Towards a nomenclature of urban green spaces to better characterize urban runoff in rainy weather"

17h00-17h30

Kresno-pandoyo F. and Sadia P.

"Comparison of the hydrological performance of sub-catchments: Case study on the Etang de l'Or in the Hérault area, France"
